Our Business

Our project professionals, together with our seamless systems, deliver high-value, tailored solutions that ensure projects succeed at every phase. Our team has decades of experience in the Energy and Resources sectors. Together with our engineering and commercial capabilities, we bring a full complement of skills to maximise value across all stages of the project lifecycle.

Our Capabilities

Project Development and Assessment

Our core skill lies in developing energy & resource projects from initial assessment to final investment. This includes:

- Opportunity Framing & Workshop Facilitation
- Comprehensive technical, commercial and regulatory due diligence assessments
- Technical Feasibility studies across multiple sectors include mining, wind, solar, gas, pipelines, LNG and power generation
- Stakeholder Identification Management
- Regulatory & Government Approvals
- Risk & Opportunity Identification & Management
- Economic Modelling
- Work Program Development and Management

Project Delivery

Our team has decades of project delivery experience, a skill required at all stages of a project. We bring real-life insights & knowledge to:

- Project Management
- Project Schedule Development & Maintenance.
- Project Procurement Services
- Contract Management
- Scope Development & Documentation
- Project Execution Planning
- Construction Management
- Quality Assurance & Control
- Commissioning Support

Specialist Professional Services

Central to developing projects is our experience in high-value technical services. This includes our knowledge of:

- Specialist engineering & technical support
- Environmental & Sustainability consulting
- Economic modelling & business case development
- Regulatory approvals & compliance
- Process Safety
- Safety & Risk
- Carbon Capture & Storage

Strategic Advisory & Commercial Services

Our core skill lies in developing energy & resource projects from initial assessment to final investment. This includes:

- Due Diligence Studies
- Business Case Development
- Funding strategy and investor engagement
- Market Analysis for resources, traditional and renewable energy sectors
- Regulatory and Compliance assessments
- Environmental and Social Impact Assessments
